

## Evaluation and Quality Assurance

From time to time it is necessary for the University to do an audit of all of the practice learning opportunities that they use. This is done in a number of ways – evaluation questionnaires, student and practice assessor interviews, interviews by the university etc. If you are sent one of our evaluation forms or are asked to take part in one of these interviews it would be greatly appreciated if you would co-operate. This then enables the practice learning team to reflect on what is working and what might need changing / developing in the future.
